

Engineers land key M&S role

A HUDDERSFIELD firm of consulting engineers was appointed to work on the largest Marks and Spencer store outside London.

Sanderson Associates will be designing and project managing all the off-site highway works at the M&S store at Cheshire Oaks in Ellesmere Port near Chester.

The flagship store, Marks and Spencer's largest for 10 years, will be their biggest development in the UK outside London.

The firm's MD, Alison France, said: "This is a tremendous start to the New Year for us. Cheshire Oaks is a major development and we look forward to delivering a complex project on time and within budget."
